SOAP CLINICAL NOTE

S - Subjective

20yo female maithri suffering from appendix

O - Objective

TPA 101

A - Assessment

Appendicitis requiring surgery

P - Plan

Surgeru required

Evidence Completeness	40%
Justification Score	0.92 / 1.00
Missing Evidence	Prior treatment
Missing Evidence	Investigations
Missing Evidence	Referral
Reason	Insufficient clinical evidence (40% complete) — most fields missing.
Reason	Clinical justification meets documentation quality standards.
Reason	Critical condition — strong medical necessity supports authorization.
Suggestion	Describe previous treatments tried and their outcomes (e.g. medications, physiotherapy).
Suggestion	Include lab results, imaging reports, or diagnostic test findings (e.g. ECG, X-ray, blood work).
Suggestion	Specify if specialist referral was obtained, pending, or attempted, and the specialist's name/specialty.

RISK FLAGS		
Severity	Flag	Description
MEDIUM	Incomplete clinical evidence	Missing evidence: Prior treatment, Investigations, Referral. May negatively affect approval decision.
MEDIUM	No specialist referral documented	Serious conditions typically require specialist involvement for insurance authorization.
MEDIUM	No diagnostic investigations documented	Lab results, imaging, or diagnostic test data are expected for this condition type.
